

presents a *FREE* 2 night workshop:

Do-It-Yourself SOLAR!

TUES. Jun 17th and 24th at 7:00 pm

Anyone interested in solar technology, who wants to learn more about a less expensive Solar Do-It-Yourself option should attend!

This is a *FREE* hands-on workshop teaching you about:

- solar photovoltaic (PV) – electric generating panels
- the costs and return on your solar investment
- how to install the DIY solar panels

NO EXPERIENCE IS NECESSARY TO ATTEND.

Blair Buselli, of Buselli Plumbing and Heating, a local family plumbing business in operation for over 30 years, will be conducting this two night workshop. Blair is a PA & NY approved installer, and NABCEP Certified Installer. Blair started Shekinah Solar and has been installing solar in our area since 2009.

The first session on June 17th will include an overview of solar installation, how it works, and how to determine if your home is in a good location for solar. We will also cover solar economics – how much it costs, and what kind of a return you can expect on your solar investment.

The second session will cover installation training: including the racking, panels, inverters and wiring. We will cover proper labeling, permitting requirements, utility inspection and net-metering agreements and monitoring systems to oversee your electric generation.

There will be an opportunity to buy DIY solar kits at the end of the workshop. SEEDS is committed to educating our community on renewable energy, and purchase is NOT required.

This workshop is free and open to the general public. Coffee/Tea and baked goods will be served.

**At the Park Street Complex; 648 Park Street, Honesdale
near Wayne Memorial Hospital**

Registration is encouraged, but not required.
